Brush Research Mfg. is proud to offer the best parts wash brush on the market today. Injection molded Polypropylene handles and synthetic filaments for resistance to solvent cleaners. All metal parts are either stainless steel or brass for corrosion resistance. These are superior tools that will make each and every job easier and faster, saving both time and money. All tube fittings are manufactured to allow use on the most popular recirculating parts washers such as Enco, KleerFlo, Safety Kleen and others. The ergonomic styles will reduce any wrist strain and allow for increased pressure during cleaning.

NEW SOFT TIP

WHEEL CLEANING BRUSH

Wheels are a problem for all auto detailers. BRM's Soft Tip Wheel Cleaning Brushes push the dirt away, making cleaning more efficient. The unique, high quality soft-pointed tip allows the brush to access places other brushes cannot while lasting longer.

PWCST	PARTS WASH BRUSH STRAIGHT HANDLE SOFT TIP
PWAST	PARTS WASH BRUSH STRAIGHT HANDLE SOFT TIP FLOW THRU

SOFT TIP IS IDEAL FOR:
